Thank you everyone for a successful presale!

First things first, I am extremely grateful for everyone who believed in the $BLACKPINK as well as for taking a leap of faith to purchase this coin. I wasn’t expecting this Presale success as all coins sold out in 60 seconds. Therefore, I didn’t prepare any Post-presale announcement, thus this delay of which I apologize.

Secondly, for all of those who wanted to get in but couldn’t, it’s my mistake to have misjudged the situation by setting the hard cap at only 200BNB which led to this presale ending in less than 1 minute. However, I am grateful to you, and I truly believe this is not the end but the beginning of our success story. Therefore, kindly place your faith in me once again and get in when the Pancake swap is launched.

I have decided to launch Pancake Swap in 48 hours on Wednesday, 2nd June, 10 AM (EST). In the meantime, I have set up awareness promos to attract full traffic to this launch so we can scale it to the moon on the launch date.

Please allow me to make this request from all holders - do not sell on launch date. Yes, it could give you a 5-10x return, but that isn’t our goal. It’s not the goal for $BLACKPINK coin. Our goal is to make everyone here a billionaire. Yes, a billionaire in 3-5 years. It is also one of the reasons why I don’t mind locking it for months because I’m not looking at the short term so try to take a leap of faith in me this time.

This could be an opportunity that we all have to reach the moon so let’s make it count.

Some facts about me (Why you should trust me):

I have run e-Commerce businesses for more than 20 years and have launched some of the most viral Facebook campaigns in the world in 2019, 2020, and 2021, with multiple brands all reaching multi-million dollar levels. So why then am I into Crypto, you may ask?

My goal for getting involved in Crypto as it stands isn’t to gamble or make some profit – it is more about an accomplishment which is to drive a sustainable massive campaign to the moon, Mars and even beyond.

I launched the $BLACKPINK in a day, you can confirm this on Twitter to see when I just signed up. The truth is, if I could do all this (with your help of course) in a day, think of what we could all achieve in 1 year, 5 years? With your help, with this community, with all of us, my target is to get us into the World's Top 100 Coin, with a market cap of 50+ billions, with everyone of us a millionaire (if not a billionaire), at least.

The journey has just begun, why not join me and let’s get to the moon together?

For all of coin holders, the believers, the first mission for all of us, is to hold. Secondly, do share $BLACKPINK with everyone, shill it, do the best you can, and we will see how far we can achieve. Just know this, whoever doesn't believe in $BLACKPINK, simply consider it their loss.

Finally, for all believers in this coin who got in slightly late and missed the Presale, I apologize in earnest. There’s another chance for you to get in on our launch date, Wednesday 2nd June, 10 AM (EST).

I am grateful for your trust and confidence in $BLACKPINK.

Thank you once again.

All the best,

BP
